

Kensington

Material The Kensington collection is made of sturdy recycled 100 year old aged wood. The polished high gloss frame is made of stainless steel.

In addition to the luxurious high gloss stainless steel, a black powder-coated frame is also available giving it a more industrial look. A very desirable and popular look these days.

Because of the robust uneven structure of the wood, it is possible to order fitting polished glass tops for all items.

Maintenance It is important to maintain your Kensington furniture in order to keep it looking beautiful, as you would with other cherished items.

Remove stains immediately; do NOT rub the spill, dab it with a paper towel or an absorbing cloth.

Do Not use or apply any furniture maintenance products containing silicone or solvents like; stain removers, turpentine or white-spirit.

Stains can be removed with water and mild natural soap if necessary. Be careful with cleaning products containing bleach additives (Lemon for example).

Abrasive cleaning products shouldn't be used at all.

To clean the tops use a vacuum cleaner with soft brush attachment every now and then. The polished steel frame can be cleaned with a damp shammy cloth.

This way you will keep your furniture looking beautiful and it will last for ever.
