

Macaron

Material The Macaron collection is just like the name suggests inspired by the delicious delicacy; the macaroon. The double oak rustic black tops support on 3 solid (concrete-filled) metal legs which are finished in brushed gold.

Maintenance Like everything you care about and want to keep beautiful, Macaron also requires light maintenance. It is sufficient to wipe the furniture with a slightly damp, clean (preferably cotton) cloth.

Cleaning products contain harmful bleach ingredients and chemicals that damage the metal and can affect wood; its use is highly discouraged.

To prevent damage and/or circles in the wood we recommend that you use coasters.

If you take note of the above maintenance advice you will enjoy your Macaron furniture for a long time.
